**Solve each problem.****Answers**

- 1) Nancy purchases 2 indoor plants, each costing \$4.20. She pays with 20 dollars. How much is her change?  
 $4.20 \times 2 = 8.40$
- 2) Debby purchased 4 gift cards. Each card was priced at \$2.45 and she handed over 20 dollars. What should be the amount of her change?  
 $2.45 \times 4 = 9.80$
- 3) Paul got 3 pet toys at the pet store. If the cost per toy is \$2.85 and he pays 20 dollars, how much change should he expect back?  
 $2.85 \times 3 = 8.55$
- 4) Katie attended a concert and bought 4 tickets for \$1.25 each. She handed the cashier 20 dollars. What should be her change?  
 $1.25 \times 4 = 5.00$
- 5) Oliver wants to buy 3 paintbrushes for his art class. The cost of each is \$2.75. If he pays with 20 dollars, what is the amount of change he should receive?  
 $2.75 \times 3 = 8.25$
- 6) Henry saw his favorite chips on sale for \$1.95 per bag. He decided to buy 5 bags and paid the cashier 20 dollars. Calculate his change.  
 $1.95 \times 5 = 9.75$
- 7) Carol is at a store to buy 4 hair accessories, priced at \$2.20. She pays with 20 dollars. How much change should she get?  
 $2.20 \times 4 = 8.80$
- 8) Bianca needs 4 notebooks for her classes. Each notebook is priced at \$2.25. She gives the cashier 20 dollars. Calculate her change.  
 $2.25 \times 4 = 9.00$
- 9) Kaleb purchased 3 soccer balls from "Bob's Sport Supplies". If each soccer ball costs \$6.60 and he gives the cashier 20 dollars, how much change is he owed?  
 $6.60 \times 3 = 19.80$
- 10) Lana is at a book fair, where she buys 3 books. If each book costs \$6.50, and she pays with 20 dollars, how much is her change?  
 $6.50 \times 3 = 19.50$

1. **\$11.60**
2. **\$10.20**
3. **\$11.45**
4. **\$15.00**
5. **\$11.75**
6. **\$10.25**
7. **\$11.20**
8. **\$11.00**
9. **\$0.20**
10. **\$0.50**

**Solve each problem.****Answers**

\$11.75	\$10.25	\$10.20	\$11.20	\$11.45
\$0.20	\$11.00	\$11.60	\$15.00	\$0.50
