

Two Step Problems

Name: _____

Solve each problem.

- 1) While playing a trivia game, Billy answered two questions correct in the first half and three questions correct in the second half. If each question was worth nine points, what was his final score?

- 2) April's discount flowers was having a sale where each flower was four dollars. If Rachel bought two roses and five daisies, how much did she spend?

- 3) Olivia was playing a video game where she scores four points for each treasure she finds. If she found two treasures on the first level and six on the second, what would her score be?

- 4) Nancy was unboxing some of her old winter clothes. She found four boxes of clothing and inside each box there were six scarves and three mittens. How many pieces of winter clothing did Nancy have total?

- 5) Carol bought seven new chairs and three new tables for her house. If she spent six minutes on each piece furniture putting it together, how many minutes did it take her to finish?

- 6) A pet store has six bird cages. If each cage has three parrots and six parakeets in it, how many birds does the pet store have total?

- 7) Henry was collecting cans for recycling. On Saturday he filled three bags up and on Sunday he filled seven more bags. If each bag had nine cans in it, how many cans did he pick up total?

- 8) Ned bought eight boxes of chocolate candy and two boxes of caramel candy. If each box has three pieces inside it, how much candy did he have total?

- 9) Haley was organizing her book case making sure each of the shelves had exactly three books on it. If she had two shelves of mystery books and two shelves of picture books, how many books did she have total?

- 10) Frank and his friend were buying trick decks from the magic shop for three dollars each. How much did they spend if Frank bought five decks and his friend bought four decks?

Answers

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
