

**Determine which choice shows the expression used to solve the problem.****Answers**

- 1) A mailman has to give fifteen pieces of junk mail to each block. If there are three houses on a block how many pieces of junk mail should he give each house ?  
A.  $15 + 3$                       B.  $15 - 3$                       C.  $15 \times 3$                       D.  $15 \div 3$
- 2) Billy bought eleven books at the book fair. If he gave eight of them to his brother, how many books did he have left?  
A.  $11 + 8$                       B.  $11 - 8$                       C.  $11 \times 8$                       D.  $11 \div 8$
- 3) Paige had eight video games. If she put them into stacks with two in each stack, how many stacks could she make?  
A.  $8 + 2$                       B.  $8 - 2$                       C.  $8 \times 2$                       D.  $8 \div 2$
- 4) Bianca was placing her pencils into rows with seven pencils in each row. If she had fourteen pencils, how many rows could she make?  
A.  $14 + 7$                       B.  $14 - 7$                       C.  $14 \times 7$                       D.  $14 \div 7$
- 5) Emily bought three new shirts for school. If she already had seven shirts, how many did she own total?  
A.  $3 + 7$                       B.  $7 - 3$                       C.  $3 \times 7$                       D.  $7 \div 3$
- 6) Mike won five tickets playing games at the arcade. If he spent three tickets buying a water gun, how many tickets did he still have?  
A.  $5 + 3$                       B.  $5 - 3$                       C.  $5 \times 3$                       D.  $5 \div 3$
- 7) Debby's mom was buying extra school supplies for Debby and her sister. If she bought six reams of paper for Debby and two reams for her sister, how many did she buy total?  
A.  $6 + 2$                       B.  $6 - 2$                       C.  $6 \times 2$                       D.  $6 \div 2$
- 8) The soda machine in the lobby of a hotel cost six quarters for each can. How many quarters would you need for nine sodas?  
A.  $6 + 9$                       B.  $9 - 6$                       C.  $6 \times 9$                       D.  $9 \div 6$
- 9) Faye was collecting cans for recycling. On Monday she had six bags of cans. The next day she found three more bags worth. How many bags did she have total?  
A.  $6 + 3$                       B.  $6 - 3$                       C.  $6 \times 3$                       D.  $6 \div 3$
- 10) Luke could fit four action figures on each shelf in his room. His room has three shelves. How many action figures total could his shelves hold?  
A.  $4 + 3$                       B.  $4 - 3$                       C.  $4 \times 3$                       D.  $4 \div 3$
