

**Solve each problem.****Answers**

- 1) April's discount flowers was having a sale where each rose was five dollars. If April started with fourteen roses and had six roses left, how much money did she earn?
- 2) Dave bought ten boxes of chocolate candy and gave seven to his little brother. If each box has four pieces inside it, how many pieces did Dave still have?
- 3) Sarah baked six brownies, but needed thirteen total for her party. If she used two spoonfuls of flour on each one, how much cups of flour does she still need?
- 4) A worksheet had two problems on it. If a teacher had fifteen worksheets to grade and had already graded seven of them, how many more problems does she have to grade?
- 5) Mike invited seven friends to a birthday party, but five couldn't come. If he wanted to buy enough cupcakes so each person could have exactly seven, how many should he buy?
- 6) Each chocolate bar in a box cost \$7. If a box had thirteen bars total and Haley sold all but four bars, how much money would she have made?
- 7) Luke earned eight dollars for each lawn he mowed. If he had eight lawns to mow, but forgot to mow two of them, how much money did he actually earn?
- 8) There were twelve friends playing a video game online when six players quit. If each player left had four lives, how many lives did they have total?
- 9) Victor had two action figures, but needed eight total for a complete collection. If each one costs \$3, how much money would he need to finish his collection?
- 10) At lunch a waiter had eight customers and three of them didn't leave a tip. If he got \$2 each from the ones who did tip, how much money did he earn?

1. _____
