

Use each diagram to solve the problems.

- 1) If you were to select 1 shape at random from the array, what is the probability it will be a circle?
- 2) If you were to select 1 shape at random from the array, what shape do you have the greatest probability of selecting?
- 3) How many shapes are there total in the array?
- 4) Which shape has a 24.00% chance (6 out of 25) of being selected?

- 5) If you spun the spinner 1 time, what is the probability it would land on a black piece?
- 6) If you spun the spinner 1 time, what is the probability it would land on a gray piece?
- 7) How many pieces are there total in the spinner?
- 8) If you spun the spinner 1 time, what is the probability it would land on a white piece?
- 9) If you spun the spinner 1 time, what is the probability of landing on either a white piece or a black piece?

- 10) If you were to roll the dice one time what is the probability it will land on a 2?
- 11) If you were to roll the dice one time what is the probability it will NOT land on a 1?
- 12) If you were to roll the dice one time, what is the probability of it landing on an odd number?

**Answers**
